

Courts of South Beach, Florida

civil engineering

Located in the historic South Beach district of Miami Beach, The Courts of South Beach encompasses three city blocks between 1st and 2nd Streets and Alton Road and Washington Avenue. This 400-unit, multi-family condominium project features such amenities as racquetball courts, an olympic-sized swimming pool, a day care center and retail shops.

Coastal Systems International, Inc. provided site-civil engineering services for infrastructure development including all water, sewer, drainage, storm-water runoff, and permitting needed to initiate construction. In addition, Coastal Systems provided condominium graphic documents and sales and marketing brochures.
