

Shops at South Beach, Florida

civil engineering

Coastal systems International, Inc. designed, inspected, permitted and supervised the construction of a new parking garage and retail shops as part of the South Beach Area Redevelopment project. Existing conditions of the site required a new design approach and reconstruction efforts for specific areas. Coastal Systems provided Civil Engineering services, which included the successful implementation of recommended improvements to the Storm Water Management System, Water Main Extension, Sanitary Services, and off-site areas.

Pavment Restoration

Replacement Sidewalk

Watermain Installation
